

Table 4. Pregnancy-related Mortality per 100,000 Live Births for Blacks and Whites, North Carolina Residents 1999-2013.

Year	Deaths		Live births		Rate ¹		Relative Risk ²
	White Non-Hispanic	Black Non-Hispanic	White Non-Hispanic	Black Non-Hispanic	White Non-Hispanic	Black Non-Hispanic	
1999	8	11	71,536	28,277	11.2	38.9	3.5
2000	8	8	74,028	29,206	10.8	27.4	2.5
2001	3	16	70,920	28,235	4.2	56.7	13.4
2002	7	15	70,329	27,416	10.0	54.7	5.5
2003	9	16	70,571	26,949	12.8	59.4	4.7
2004	7	14	70,351	27,372	10.0	51.1	5.1
2005	10	14	70,413	28,146	14.2	49.7	3.5
2006	6	5	71,417	29,626	8.4	16.9	2.0
2007	7	12	72,501	30,575	9.7	39.2	4.1
2008	10	10	72,253	31,108	13.8	32.1	2.3
2009	14	12	70,535	30,219	19.8	39.7	2.0
2010	8	6	68,795	28,926	11.6	20.7	1.8
2011	8	8	67,542	28,509	11.8	28.1	2.4
2012	9	7	67,013	28,373	13.4	24.7	1.8
2013	16	7	66,181	28,865	24.2	24.3	1.0
Total	130	161	1,054,385	431,802	12.3	37.3	3.0

1 Deaths per 100,000 live births.

2 Relative risk is calculated by dividing the black non-Hispanic rate by the white non-Hispanic rate.
