Produced by the NC Central Cancer Registry, 01/2022

Updated 2020 Incidence Rates will be available in January 2023.

Numbers are subject to change as files are updated.

Cases may not sum to totals due to unknown or other values.

** Cancer incidence rates for cell sizes with fewer than 16 cases of cancer are suppressed as they are not stable.

Cancers of the urinary bladder and female breast include in situ cases.

Rates are calculated using the bridged-race population estimates obtained from the National Center for Health Statistics available online at

www.cdc.gov/nchs/nvss/bridged_race/data_documentation.htm#vintage2020.
