Rates are per 100,000 persons and are age-adjusted to the 2000 U.S. Census.

Cancers of the urinary bladder and female breast include in situ cases.

Brain and other central nervous system cancer excludes benign cases.

\*\* Cancer incidence rates for all cell sizes with fewer than 16 cases of cancer and cancer mortality rates based on any cancer deaths less than 16 are suppressed as they are not stable.

Rates are calculated using vintage 2021 non-bridged population estimates, based on the 2020 Census.
