

SURVEILLANCE UPDATE

Falls in the past 3 months that caused an injury: 2006 N.C. Behavioral Risk Factor Surveillance System

Percentage of people age 45 or older in N.C. who reported having a fall that caused an injury in the past three months, by gender: N.C. BRFSS 2006

Percentage of people age 45 or older in N.C. who reported having a fall that caused an injury in the past three months, by age group: N.C. BRFSS 2006

Percentage of people age 45 or older in N.C. who reported having a fall that caused an injury in the past three months, by educational attainment: N.C. BRFSS 2006

Percentage of people age 45 or older in N.C. who reported having a fall that caused an injury in the past three months, by income: N.C. BRFSS 2006

Weighted to provide estimates representative of the adult non-institutionalized population; of people aged 45 years and older who reported having fallen down in the past three months, how many of those falls caused an injury. Specific data on 95 percent confidence intervals is at the N.C. BRFSS website:
www.schs.state.nc.us/SCHS/brfss

The N.C. Behavioral Risk Factor Surveillance System (N.C. BRFSS) provides a critical source of public health data for understanding the scope of the injury-related problems and measuring progress toward overall statewide goals. N.C. BRFSS is a comprehensive telephone survey of adults ages 18 and older. The sample size for the 2006 N.C. BRFSS was nearly 16,000. Every year a core set of injury-related questions are asked. In 2006, four injury-related questions were asked on topics regarding falls, seatbelt usage, and drinking and driving. The sampling scheme has been designed to produce estimates for local levels (22 counties and 13 regions) and for special populations such as Native Americans and Spanish-speaking and English-speaking Hispanics. See the N.C. BRFSS website for more information, specific details on item responses, and data limitations: www.schs.state.nc.us/SCHS/brfss.
