

Surveillance Update

Preventive Health Care for Children — North Carolina 2008

Percentage of NC Parents Who Reported that Their Child Has Had a Preventive Care Visit or Well Child Check-up in the Past 12 Months, by Child's Sex

Percentage of NC Parents Who Reported that Their Child Has Had a Preventive Care Visit or Well Child Check-up in the Past 12 Months, by Child's Race

Percentage of NC Parents Who Reported that Their Child Has Had a Preventive Care Visit or Well Child Check-up in the Past 12 Months, by Child's Age Group

Percentage of NC Parents Who Reported that Their Child Has Had a Preventive Care Visit or Well Child Check-up in the Past 12 Months, by Parent's Education Level

The North Carolina Child Health Assessment and Monitoring Program (NC CHAMP) is a surveillance system that collects information about the health characteristics of children from birth to age 17. NC CHAMP is a follow-up survey of the Behavioral Risk Factor Surveillance System (BRFSS) which is a telephone survey of adults, ages 18 and older. All adult respondents with children living in their household are invited to participate in the CHAMP survey. One child is randomly selected from the household and the adult most knowledgeable about the health of the selected child is interviewed in a follow-up survey. This surveillance update includes data collected in 2008 on 2,965 parental surveys of children ages birth to 17 who responded to the question "Preventive care visits include things like a Well Child check-up, a routine physical exam, immunizations, or health screening tests. During the past 12 months has (child) had a preventive care visit or Well Child check-up?" For more detailed information than what is presented here, including confidence intervals for the prevalence rates reported above, please visit the NC CHAMP Web site at: www.schs.state.nc.us/SCHS/champ.
