NORTH CAROLINA STATE BOARD OF HEALTH

J.W.R. NORTON, M.D.

Secretary

and State Health Officer

LETTER OF TRANSMITTAL

Raleigh, North Carolina
September 24, 1957

The Honorable Luther H. Hodges
Governor of North Carolina
Raleigh, North Carolina

Dear Governor Hodges:

I have the honor of transmitting the report for the Public Health Statistics Section of the Epidemiology Division, State Board of Health, covering the calendar year 1956.

Respectfully submitted,

J. W. R. Norton, M. D.
Secretary and State Health Officer

CONTENTS

TABLE	PAGE
1. Estimated population by color: North Carolina, each county, and incorporated places having a population of 10,000 or more, July 1, 1956..	7
2. Live births and deaths with crude rates per 1,000 population, also maternal deaths, infant deaths, and fetal deaths with rates per 1,000 live births: North Carolina, 1914-1956.....	9
3. Live births by color with crude rates per 1,000 population, by person in attendance: North Carolina, and each county, 1956.....	10
4. Live births by color with crude rates per 1,000 population, by person in attendance: each incorporated place in North Carolina having a population of 10,000 or more, 1956.....	13
5. Resident live births by color and sex, showing month of birth: North Carolina, 1956.....	14
6. Resident live births by color and age of mother, showing birth order: North Carolina, 1956.....	15
7. Resident cases of plural births classified by number of children born alive and stillborn, by color and sex: North Carolina, 1956.....	16
8. Resident live births and deaths filed in 1956 showing number received in time to be included in 1955 or 1956 annual reports: North Carolina and each county.....	17
9. Resident deaths (excluding fetal deaths) from each cause by age, color, and sex with specific death rates per 1,000 population (1950 census) by age, color, and sex for all causes: North Carolina, 1956.....	19
10. Deaths (excluding fetal deaths) by color with crude rates per 1,000 population: North Carolina and each county, 1956.....	57
11. Deaths (excluding fetal deaths) by color with crude rates per 1,000 population: each incorporated place in North Carolina having a population of 10,000 or more, 1956.....	60
12. Resident deaths (excluding fetal deaths) by cause (abbreviated list of 52 causes), by color: North Carolina and each county, 1956.....	61
13. Resident deaths (excluding fetal deaths) by cause (abbreviated list of 52 causes), by color: each incorporated place in North Carolina having a population of 10,000 or more, 1956.....	79
14. Deaths (excluding fetal deaths) from selected causes with rates: North Carolina, 1916-1956.....	85
15. Leading causes of resident deaths (excluding fetal deaths) by age, color, and sex: North Carolina, five-year average, 1952-1956.....	91

CONTENTS - Continued

16. Motor vehicle and nonmotor vehicle accidental deaths by place of occurrence: North Carolina, each county and each incorporated place having a population of 10,000 or more, 1956.....	94
17. Accidental deaths by cause, color, and sex with crude rates per 100,000 estimated population: North Carolina occurrences, 1956.....	97
18. Resident infant deaths by cause and age: North Carolina, 1956.....	98
19. Resident infant and maternal deaths by color with rates: North Carolina and each county, 1956 and five-year average, 1952-1956.....	100
20. Resident live births, illegitimates, deaths, fetal deaths, infant deaths, and maternal deaths by color (Indians included in "nonwhite") with number occurring in hospitals: North Carolina, each county, urban and rural, 1956.....	103
21. Resident live births, illegitimates, deaths, fetal deaths, infant deaths, and maternal deaths of Indians with number occurring in hospitals: North Carolina, each county, urban and rural, 1956.....	113
22. Resident live births and deaths (excluding fetal deaths) by color and institution of occurrence: North Carolina and each county, 1956.....	114
23. Resident fetal deaths by color and sex with ratios per 1,000 live births: North Carolina and each county, 1956.....	117
24. Resident fetal deaths by color and sex with ratios per 1,000 live births: each incorporated place in North Carolina having a population of 10,000 or more, 1956.....	119
25. Resident fetal deaths by age of mother, color, and attendant with percentage distribution: North Carolina, 1956.....	120

INTRODUCTION

The forty-first annual report, Part II, of the Public Health Statistics Section, formerly known as the Bureau of Vital Statistics, presents tabular information regarding North Carolina's population, births, deaths, and fetal deaths. The majority of the tabulations are by place of residence; selected tabulations, in whole or in part, are given by place of occurrence. Communicable disease morbidity data are shown in Part I of the annual report of the Section which is printed separately.

Reports have been published annually since 1914 with the exception of the years 1918 and 1919.

Certificates of births, deaths, and fetal deaths occurring in 1956 that were filed in 1956 and the first three months of 1957 are included in this report. It is estimated that vital events occurring in 1956 but reported after the first three months of 1957 will comprise less than two per cent of the total 1956 events. There are strong indications that registration in the state has been improving in recent years. The certificates are more complete and accurate and on the average have been filed more promptly.

Again in 1956 a tabulation was made of all birth and death certificates filed in 1956 by year of occurrence (see 1950 or 1951 annual report for explanation of interpretation). This was done in an effort to determine the per cent of certificates filed in time to be included in an annual report as compared with those filed too late to be included. The results of this study are shown in Table 8 of this report. This tabulation was prepared by county of residence in order to make available a correction factor that could be used by each county to more accurately calculate the natality and mortality rates.

Population

The population data in this report are estimated as of July 1, 1956, by the arithmetic method. This method assumes that each county or city had the same actual annual increase or decrease between 1955 and 1956 that it had on the average each year between 1940 and 1950.

Natality

In 1956 there were 115,792 live births occurring to mothers who were residents of the state. All births were allocated to the place of residence of the mother regardless of the place of birth or the length of residence. Births occurring in hospitals, sanatoria, and all other institutions, were allocated to the place where the mother lived. Births occurring on military bases to military personnel were allocated according to the residence shown on the certificate. The crude birth rate was 26.5 births per 1,000 population. There were 77,264 white births and 38,528 nonwhite births. For the tenth consecutive year, over 100,000 births were recorded.

This state defines a fetal death as a fetus showing no evidence of life after complete birth if the twentieth week of gestation has been reached. There were 2,214 resident fetal deaths reported, resulting in a ratio of 19.1 fetal deaths per 1,000 live births. If fetal deaths were considered as a single cause of death, they would rank fourth between cancer and influenza and pneumonia as a leading cause of death.

INTRODUCTION

The forty-first annual report, Part II, of the Public Health Statistics Section, formerly known as the Bureau of Vital Statistics, presents tabular information regarding North Carolina's population, births, deaths, and fetal deaths. The majority of the tabulations are by place of residence; selected tabulations, in whole or in part, are given by place of occurrence. Communicable disease morbidity data are shown in Part I of the annual report of the Section which is printed separately.

Reports have been published annually since 1914 with the exception of the years 1918 and 1919.

Certificates of births, deaths, and fetal deaths occurring in 1956 that were filed in 1956 and the first three months of 1957 are included in this report. It is estimated that vital events occurring in 1956 but reported after the first three months of 1957 will comprise less than two per cent of the total 1956 events. There are strong indications that registration in the state has been improving in recent years. The certificates are more complete and accurate and on the average have been filed more promptly.

Again in 1956 a tabulation was made of all birth and death certificates filed in 1956 by year of occurrence (see 1950 or 1951 annual report for explanation of interpretation). This was done in an effort to determine the per cent of certificates filed in time to be included in an annual report as compared with those filed too late to be included. The results of this study are shown in Table 8 of this report. This tabulation was prepared by county of residence in order to make available a correction factor that could be used by each county to more accurately calculate the natality and mortality rates.

Population

The population data in this report are estimated as of July 1, 1956, by the arithmetic method. This method assumes that each county or city had the same actual annual increase or decrease between 1955 and 1956 that it had on the average each year between 1940 and 1950.

Natality

In 1956 there were 115,792 live births occurring to mothers who were residents of the state. All births were allocated to the place of residence of the mother regardless of the place of birth or the length of residence. Births occurring in hospitals, sanatoria, and all other institutions, were allocated to the place where the mother lived. Births occurring on military bases to military personnel were allocated according to the residence shown on the certificate. The crude birth rate was 26.5 births per 1,000 population. There were 77,264 white births and 38,528 nonwhite births. For the tenth consecutive year, over 100,000 births were recorded.

This state defines a fetal death as a fetus showing no evidence of life after complete birth if the twentieth week of gestation has been reached. There were 2,214 resident fetal deaths reported, resulting in a ratio of 19.1 fetal deaths per 1,000 live births. If fetal deaths were considered as a single cause of death, they would rank fourth between cancer and influenza and pneumonia as a leading cause of death.

Premature Births

In order to achieve uniformity in the classification of premature infants in need of special care, and comparability of statistical data in hospitals and in studies of such infants, the definition of the American Academy of Pediatrics has been adopted; that is, a premature infant is an infant weighing 2500 grams (5½ pounds) or less at birth regardless of the period of gestation.

In 1956 there were 9,780 resident premature live births reported among 115,792 live births. Birth weight was reported on all but 116 certificates filed in 1956. Consequently, at least 8.4 per cent of the new born babies weighed 2500 grams or less at birth. The number of premature infants by birth weight and color and by birth weight and age of mother are shown in the tables which follow:

RESIDENT PREMATURE LIVE BIRTHS BY COLOR AND WEIGHT: NORTH CAROLINA, 1956

Mortality

There were 33,117 resident deaths recorded in 1956. The crude death rate was 7.6 deaths per 1,000 estimated population. Deaths were allocated to the place where the

deceased resided unless the place of death item indicated that the deceased had been in the place of death for one year or more. In such cases they were allocated to the place of death, unless the death occurred in an institution. If this was the case, they were allocated to the place of residence, regardless of the length of stay in the institution.

Diseases of the heart, as they have been for the past 40 years, were responsible for more deaths than any other cause, accounting for approximately one-third of all deaths for the year.

All mortality statistics shown by cause in this report are classified according to the Sixth Decennial Revision of the International Lists of Diseases and Causes of Death. This is the eighth year that this revised statistical code has been applied to the causes of death.

In Table 14, regarding deaths from selected causes with rates, 1916-1956, it is necessary to take into consideration the effect of the revision of the International List and of the joint cause of death coding procedure in making comparisons between the trend in causes of death since 1949 with prior years. Comparability ratios for specific causes of death may be obtained upon request.

Infant and Maternal Mortality

There were 3,583 infant deaths and 78 maternal deaths reported. The resultant infant death rate per 1,000 live births was 30.9 while the maternal death rate was 6.7 per 10,000 live births.

In 1918, there was an all-time high rate of 101.8 infant deaths per 1,000 live births. The infant mortality rate was more than three times as high thirty-eight years ago as it was in 1956 while the maternal rate was 16 times higher at that time.

Hospital Data

All tables in this report which reflect events occurring in hospitals are based on the general and allied hospital definition of the North Carolina Medical Care Commission. A hospital is defined as a place where two or more non-related individuals reside 24 hours or more on the premises and receive medical care over and above any domiciliary care.

Rates

All rates shown in this report are crude rates unless otherwise specified. Such rates have not been adjusted for differences in the age, sex, color, rural or urban distribution of the population, or for under-registration or late reporting. Such factors should be kept in mind when comparing two different areas or time periods.

*All population estimates by U. S. Census bureau except 1951-1956 which were estimated by PHSS. Census years 1920, 1930, 1940, 1950 not estimated. Number births and deaths revised in accordance with national reports published 1917-1954 for births and 1916-1954 for deaths.

a. Fetal deaths included in births 1914, 1915.

b. Births, deaths, infant deaths and maternal deaths by place of residence, 1939-1956; previous years by occurrence.

c. Fetal deaths by place of residence 1942-1956; previous years by occurrence.

d. Neonatal deaths by place of residence 1940-1956; previous years by occurrence.

N.A. - Not Available.

TABLE 7. -- RESIDENT CASES OF PLURAL BIRTHS CLASSIFIED BY NUMBER OF CHILDREN BORN ALIVE AND STILLBORN, BY COLOR AND SEX: NORTH CAROLINA, 1956

Sex and status at birth	Cases of twins		
	Total	White	Nonwhite
Number cases of twins.....	1,281	730	551
Two males -- total cases.....	440	256	184
Both children live born.....	405	235	170
One child live born, one stillborn.....	25	12	13
Both children stillborn.....	10	9	1
One male, one female -- total cases.....	403	205	198
Both children live born.....	380	199	181
One child live born, one stillborn.....	20	6	14
Both children stillborn.....	3	-----	3
Two females -- total cases.....	438	269	169
Both children live born.....	397	246	151
One child live born, one stillborn.....	33	18	15
Both children stillborn.....	8	5	3
Sex and status at birth	Cases of triplets		
	Total	White	Nonwhite
Number cases of triplets.....	9	3	6
Three male -- total cases.....	1	-----	1
All three children live born.....	1	-----	1
One male, two female -- total cases.....	2	1	1
All three children live born.....	2	1	1
Two male, one female -- total cases.....	3	1	2
All three children live born.....	2	-----	2
Two children live born, one stillborn.....	1	1	-----
Three female -- total cases.....	3	1	2
All three children live born.....	3	1	2

12.	Acute poliomyelitis (080).....	---	---	---
13.	Smallpox (084).....	---	---	---
14.	Measles (085).....	6	2	4
15.	Typhus fever, murine (101).....	---	---	---
16.	Rocky Mountain spotted fever (104).....	---	---	---
17.	Malaria (110-117).....	---	---	---
18.	Malignant neoplasms, including neoplasms of lymphatic and hematopoietic tissues (140-205).....	1,225	833	392
19.	Benign and unspecified neoplasms (210-239).....	23	12	11
20.	Diabetes mellitus (260).....	160	98	62
21.	Pellagra (281).....	---	---	---
22.	Vascular lesions affecting central nervous system (330-334).....	1,159	669	490
23.	Meningitis, except meningococcal and tuberculous (340)...	11	3	8
24.	Rheumatic fever (400-402).....	12	1	11
25.	Chronic rheumatic heart disease (410-416).....	81	49	32
26.	Arteriosclerotic heart disease, including coronary disease (420).....	2,106	1,612	494
27.	Nonrheumatic chronic endocarditis and other myocardial degeneration (421, 422).....	244	154	90
28.	Other diseases of the heart (430-434).....	162	77	85
29.	Hypertension with heart disease (440-443).....	654	236	418
30.	Hypertension without mention of heart (444-447).....	86	41	45
31.	Influenza (480-483).....	13	7	6
32.	Pneumonia (480-483).....	279	114	165
33.	Bronchitis (500-502).....	8	4	4
34.	Ulcer of stomach and duodenum (540, 541).....	57	42	15
35.	Appendicitis (550-553).....	10	6	4
36.	Hernia and intestinal obstruction (560, 561, 570).....	34	23	11
37.	Gastritis, duodenitis, enteritis, and colitis (under 2 years) (543, 571.0, 572, 764).....	34	3	31
38.	Gastritis, duodenitis, enteritis, and colitis (2 years and over) (543, 571.1, 572).....	20	13	7
39.	Cirrhosis of liver (581).....	83	57	26
40.	Nephritis and nephrosis (590-594).....	150	61	89
41.	Sepsis of pregnancy, childbirth and the puerperium (640, 641, 651, 681, 682, 684).....	6	1	5
42.	Other diseases of pregnancy, childbirth, and the puerperium (642-650, 652-660, 670-680, 683, 685-689)...	12	---	12
43.	Congenital malformations (750-759).....	153	113	40
44.	Birth injuries, postnatal asphyxia, and atelectasis (760-762).....	254	136	118
45.	Infections of newborn, except diarrhea of newborn (763, 765-768).....	40	15	25
46.	Other diseases peculiar to early infancy (769-773).....	61	29	32
47.	Immaturity with mention of any other subsidiary condition and immaturity unqualified (774, 776).....	209	91	118
48.	All other diseases (residual).....	862	501	361
49.	Motor vehicle accidents (810-835).....	241	166	75
50.	All other accidents (800-802, 840-962).....	293	174	119
51.	Suicide (963, 970-979).....	80	70	10
52.	Homicide and injury resulting from operations of war (964, 965, 980-999).....	111	21	90
