NORTH CAROLINA STATE BOARD OF HEALTH

J. W. R. NORTON, M.D.

Secretary

and State Health Director

LETTER OF TRANSMITTAL

Raleigh, North Carolina
October 25, 1961

The Honorable Terry Sanford
Governor of North Carolina
Raleigh, North Carolina

Dear Governor Sanford:

I have the honor of transmitting the Vital Statistics report for the Public Health Statistics Section of the Epidemiology Division, State Board of Health, covering the calendar year 1960.

Respectfully submitted,

J. W. R. Norton, M. D.
State Health Director

CONTENTS

TABLE	PAGE
1. Population by color: North Carolina, each county, and incorporated places having a population of 10,000 or more, April 1, 1960.....	7
2. Live births and deaths with crude rates per 1,000 population, also maternal deaths with rates per 10,000 live births, infant deaths and fetal deaths with rates per 1,000 live births: North Carolina, 1914-1960.....	9
3. Live births by color with crude rates per 1,000 population, by person in attendance: North Carolina, and each county, 1960.....	10
4. Live births by color with crude rates per 1,000 population, by person in attendance: each incorporated place in North Carolina having a population of 10,000 or more, 1960.....	13
5. Resident live births by color and sex, showing month of birth: North Carolina, 1960.....	14
6. Resident live births by color and age of mother, showing birth order: North Carolina, 1960.....	15
7. Resident cases of plural births classified by number of children born alive and stillborn, by color and sex: North Carolina, 1960.....	16
8. Resident live births and deaths filed in 1960 showing number received in time to be included in 1959 or 1960 annual reports: North Carolina and each county.....	17
9. Resident deaths (excluding fetal deaths) from each cause by age, color, and sex with specific death rates per 1,000 population (1960 census) by age, color, and sex for all causes: North Carolina, 1960.....	19
10. Deaths (excluding fetal deaths) by color with crude rates per 1,000 population: North Carolina and each county, 1960.....	55
11. Deaths (excluding fetal deaths) by color with crude rates per 1,000 population: each incorporated place in North Carolina having a population of 10,000 or more, 1960.....	58
12. Resident deaths (excluding fetal deaths) by cause (abbreviated list of 52 causes), by color: North Carolina and each county, 1960.....	59
13. Resident deaths (excluding fetal deaths) by cause (abbreviated list of 52 causes), by color: each incorporated place in North Carolina having a population of 10,000 or more, 1960.....	77
14. Deaths (excluding fetal deaths) from selected causes with rates: North Carolina, 1920-1960, every fifth year.....	83
15. Leading causes of resident deaths (excluding fetal deaths) by age, color and sex: North Carolina, five-year average, 1956-1960.....	85

CONTENTS - Continued

16. Motor vehicle and nonmotor vehicle accidental deaths by place of occurrence: North Carolina, each county and each incorporated place having a population of 10,000 or more, 1960.....	88
17. Accidental deaths by cause, color, and sex with crude rates per 100,000 population: North Carolina occurrences, 1960.....	91
18. Resident infant deaths by cause and age: North Carolina, 1960.....	92
19. Resident infant and maternal deaths by color with rates: North Carolina and each county, 1960 and five-year average, 1956-1960.....	94
20. Resident live births, illegitimacies, deaths, fetal deaths, infant deaths, and maternal deaths by color (Indians included in "nonwhite") with number occurring in hospitals: North Carolina, each county, urban and rural, 1960.....	97
21. Resident live births, illegitimacies, deaths, fetal deaths, infant deaths, and maternal deaths of Indians with number occurring in hospitals: North Carolina, each county, urban and rural, 1960.....	107
22. Resident live births and deaths (excluding fetal deaths) by color and institution of occurrence: North Carolina and each county, 1960.....	108
23. Resident fetal deaths by color and sex with ratios per 1,000 live births: North Carolina and each county, 1960.....	111
24. Resident fetal deaths by color and sex with ratios per 1,000 live births: each incorporated place in North Carolina having a population of 10,000 or more, 1960.....	113
25. Resident fetal deaths by age of mother, color, and attendant with percentage distribution: North Carolina, 1960.....	114
26. Divorces and annulments by month of occurrence: North Carolina, 1960..	115
27. Divorces and annulments by county of occurrence: North Carolina, 1960.	116

INTRODUCTION

The forty-fifth annual report, Part II, of the Public Health Statistics Section presents tabular information regarding North Carolina's population, births, deaths, fetal deaths, and divorces. The majority of the tabulations are by place of residence; selected tabulations, in whole or in part, are given by place of occurrence. Communicable disease morbidity data are shown in Part I of the annual report of the Section which is printed separately.

Reports have been published annually since 1914 with the exception of the years 1918 and 1919.

Certificates of births, deaths, and fetal deaths occurring in 1960 that were filed in 1960 and the first three months of 1961 are included in this report. It is estimated that vital events occurring in 1960 but reported after the first three months of 1961 will comprise less than one per cent of the total 1960 events. There are factual indications that registration in the state has been improving in recent years. The certificates are more complete and accurate and on the average have been filed much more promptly.

Again in 1960 a tabulation was made of all birth and death certificates filed in 1960 by year of occurrence (see 1950 or 1951 annual report for explanation of interpretation). This was done in an effort to determine the per cent of certificates filed in time to be included in an annual report as compared with those filed too late to be included. The results of this study are shown in Table 8 of this report. This tabulation was prepared by county of residence in order to make available a correction factor that could be used by each county to more accurately calculate the natality and mortality rates.

POPULATION

The population of North Carolina as of April 1, 1960 was 4,556,155, according to the Bureau of the Census. This total represents a population gain of 494,226 or 12.2% over the 1950 total of 4,061,929. The natural increase (births over deaths) during this period was 785,770, thus the net loss during the decade due to out migration was 291,544.

NATALITY

In 1960 there were 109,732 live births occurring to mothers who were residents of the State. All births were allocated to the place of residence of the mother regardless of the place of birth or the length of residence. Births occurring in hospitals, sanatoria, and all other institutions, were allocated to the place where the mother lived. Births occurring on military bases to military personnel were allocated according to the residence shown on the certificate. The crude birth rate was 24.1 births per 1,000 population. This is the lowest rate since 1941. There were 75,069 white births and 34,663 nonwhite births. For the fifteenth consecutive year, over 100,000 births were recorded.

This State defines a fetal death as a fetus showing no evidence of life after complete birth if the twentieth week of gestation has been reached. There were 2,054 resident fetal deaths reported, resulting in a ratio of 18.7 fetal deaths per 1,000 live births. If fetal deaths were considered as a single cause of death, they would rank fourth between cancer and influenza and pneumonia as a leading cause of death.

PREMATURE BIRTHS

In order to achieve uniformity in the classification of premature infants in need of special care, and comparability of statistical data in hospitals and in studies of such infants, the definition of the American Academy of Pediatrics has been adopted; that is, a premature infant is an infant weighing 2500 grams ($5\frac{1}{2}$ pounds) or less at birth regardless of the period of gestation.

In 1960 there were 9,658 resident premature live births reported among 109,732 live births. Birth weight was reported on all but 117 certificates filed in 1960. Consequently, at least 8.8 per cent of the new born babies weighed 2500 grams or less at birth. The number of premature infants by birth weight and color and by birth weight and age of mother are shown in the tables which follow:

RESIDENT PREMATURE LIVE BIRTHS BY COLOR AND WEIGHT: NORTH CAROLINA, 1960

Birth weight in grams	Total	White	Nonwhite
Total	9,658	5,333	4,325
500 or less.....	90	48	42

MORTALITY

There were 38,102 resident deaths recorded in 1960. The crude death rate was 8.4 deaths per 1,000 population. This is the highest rate since 1941. Deaths were allocated to the place where the deceased resided unless the place of death item indicated that the deceased had been in the place of death for one year or more. In such cases they were allocated to the place of death, unless the death occurred in an institution. If this was the case, they were allocated to the place of residence, regardless of the length of stay in the institution.

All mortality statistics shown by cause in this report are classified according to the Seventh Decennial Revision of the International Lists of Diseases and Causes of Death. This is the second year that this revised statistical code has been applied to the causes of death. This revision differs slightly, if any, from the Sixth Revision, however.

In Table 14, regarding deaths from selected causes with rates, 1920-1960, it is necessary to take into consideration the effect of the revision of the International List and of the joint cause of death coding procedure in making comparisons between the trend in causes of death since 1949 with prior years. Comparability ratios for specific causes of death may be obtained upon request.

INFANT AND MATERNAL MORTALITY

There were 3,472 infant deaths and 59 maternal deaths reported. The resultant infant death rate per 1,000 live births was 31.6 while the maternal death rate was 5.4 per 10,000 live births.

In 1918 there was an all-time high rate of 101.8 infant deaths per 1,000 live births. The infant mortality rate was more than three times as high at that time as it was in 1960 while the maternal rate was nearly 20 times higher in 1918.

HOSPITAL DATA

All tables in this report which reflect events occurring in hospitals are based on the general and allied hospital definition of the North Carolina Medical Care Commission. A hospital is defined as a place where two or more non-related individuals reside 24 hours or more on the premises and receive medical care over and above any domiciliary care.

RATES

All rates shown in this report are crude rates unless otherwise specified. Such rates have not been adjusted for differences in the age, sex, color, rural or urban distribution of the population, or for underregistration or late reporting. Such factors should be kept in mind when comparing two different areas or time periods. Too, official U. S. Census Bureau enumerations as of April 1, 1960 are used rather than mid-year estimates as in non-census years.

DIVORCES AND ANNULMENT OF MARRIAGES

The central registration of divorces and annulment of marriages became effective January 1, 1958 by statutory provision. There was a total of 5,990 absolute divorces and 69 annulments of marriage recorded for the year, 1960. This represents a 4.5% decrease in divorces and a 29.6% decrease in annulments over 1959. Tabulation of divorces by plaintiff, race, type, grounds, and other characteristics are now possible for the entire State.

MORTALITY

There were 38,102 resident deaths recorded in 1960. The crude death rate was 8.4 deaths per 1,000 population. This is the highest rate since 1941. Deaths were allocated to the place where the deceased resided unless the place of death item indicated that the deceased had been in the place of death for one year or more. In such cases they were allocated to the place of death, unless the death occurred in an institution. If this was the case, they were allocated to the place of residence, regardless of the length of stay in the institution.

All mortality statistics shown by cause in this report are classified according to the Seventh Decennial Revision of the International Lists of Diseases and Causes of Death. This is the second year that this revised statistical code has been applied to the causes of death. This revision differs slightly, if any, from the Sixth Revision, however.

In Table 14, regarding deaths from selected causes with rates, 1920-1960, it is necessary to take into consideration the effect of the revision of the International List and of the joint cause of death coding procedure in making comparisons between the trend in causes of death since 1949 with prior years. Comparability ratios for specific causes of death may be obtained upon request.

INFANT AND MATERNAL MORTALITY

There were 3,472 infant deaths and 59 maternal deaths reported. The resultant infant death rate per 1,000 live births was 31.6 while the maternal death rate was 5.4 per 10,000 live births.

In 1918 there was an all-time high rate of 101.8 infant deaths per 1,000 live births. The infant mortality rate was more than three times as high at that time as it was in 1960 while the maternal rate was nearly 20 times higher in 1918.

HOSPITAL DATA

All tables in this report which reflect events occurring in hospitals are based on the general and allied hospital definition of the North Carolina Medical Care Commission. A hospital is defined as a place where two or more non-related individuals reside 24 hours or more on the premises and receive medical care over and above any domiciliary care.

RATES

All rates shown in this report are crude rates unless otherwise specified. Such rates have not been adjusted for differences in the age, sex, color, rural or urban distribution of the population, or for underregistration or late reporting. Such factors should be kept in mind when comparing two different areas or time periods. Too, official U. S. Census Bureau enumerations as of April 1, 1960 are used rather than mid-year estimates as in non-census years.

DIVORCES AND ANNULMENT OF MARRIAGES

The central registration of divorces and annulment of marriages became effective January 1, 1958 by statutory provision. There was a total of 5,990 absolute divorces and 69 annulments of marriage recorded for the year, 1960. This represents a 4.5% decrease in divorces and a 29.6% decrease in annulments over 1959. Tabulation of divorces by plaintiff, race, type, grounds, and other characteristics are now possible for the entire State.

*All population estimates by U. S. Census Bureau except 1951-1959 which were estimated by PHSS. Census years 1920, 1930, 1940, 1950, 1960 not estimated. Number births and deaths revised in accordance with national reports published 1917-1959 for births and 1916-1959 for deaths.

a. Fetal deaths included in births 1914, 1915.

b. Births, deaths, infant deaths and maternal deaths by place of residence, 1939-1960, previous years by occurrence.

c. Neonatal deaths by place of residence 1940-1960; previous years by occurrence.

d. Fetal deaths by place of residence 1942-1960; previous years by occurrence.

N.A. - Not Available

ANNUAL REPORT, NINETEEN HUNDRED SIXTY

ANNUAL REPORT NINETEEN HUNDRED SIXTY

*Previous births used for calculation of birth order include fetal deaths.

TABLE 7. -- RESIDENT CASES OF PLURAL BIRTHS CLASSIFIED BY NUMBER OF CHILDREN BORN ALIVE AND STILLBORN, BY COLOR AND SEX: NORTH CAROLINA, 1960

Sex and status at birth	Cases of twins		
	Total	White	Nonwhite
Number cases of twins.....	1,134	672	462
Two males -- total cases.....	386	242	144
Both children live born.....	350	219	131
One child live born, one stillborn.....	26	14	12
Both children stillborn.....	10	9	1
One male, one female -- total cases.....	373	197	176
Both children live born.....	354	191	163
One child live born, one stillborn.....	16	6	10
Both children stillborn.....	3	—	3
Two females -- total cases.....	375	233	142
Both children live born.....	340	213	127
One child live born, one stillborn.....	25	15	10
Both children stillborn.....	10	5	5

Sex and status at birth	Cases of triplets		
	Total	White	Nonwhite
Number cases of triplets.....	9	3	6
Three males -- total cases.....	4	2	2
All three children live born.....	3	1	2
All three children stillborn.....	1	1	—
Two males, one female -- total cases.....	2	1	1
All three children live born.....	1	1	—
Two children live born, one stillborn.....	1	—	1
One male, two females -- total cases.....	3	—	3
All three children live born.....	2	—	2
Two children live born, one stillborn.....	1	—	1
